

Advisory Services & Solutions.

As a Frontier Tech boutique advisory, we practice what we preach and scale our capabilities beyond the conventional, leveraging AI & XR at the core of our operations. Building on our award-winning program delivery practices and internationally recognized tech thought leadership, we support clients in unfolding the potential of tech and innovation. From a first use case to scaled implementations, we turn emerging tech into measurable operational advantages. Building for what's next.

Our Services.

Public Sector & Business Model Innovation

- Use case discovery and hands-on solution design
- Rapid prototyping and lean implementation roadmap design
- Pilot or project design and execution with measurable outcomes

Complex Transformation Program Delivery

- Design and execution of strategic transformation projects
- Multi-stakeholder steering across regions
- AI-enabled project management enabling up to 4x work capacity

Future of Work & Enablement

- Design & onboarding of new ways of working
- Embedding of applied emerging tech into daily operations
- Team enablement and lasting change management

PROGRESS Platform [\[coming soon\]](#)

Our client hub: curated insights, AI agents and skills, learning tracks, and videos.

- Curated tech insights and reusable frameworks
- AI agent & skill templates
- XR & AI at work guides & international best practices
